# WHAT ARE LICHEN WALLS?

Lichen walls are a convenient alternative option to bring nature to a workplace or home. Real lichens, a type of moss, undergo a special **preservation process** using glycerine and non-toxic resin to hold their shape and texture. Preserved lichens are no longer living plants, do not require watering, trimming or sunlight, whilst maintaining the beneficial visual properties of a real living plant.

They are installed onto a particle board or a plastic modular panel and can be used to **liven up a bare wall** or to create a natural barrier **to separate functional spaces.**

LICHEN WALLS

A TOUCH OF NATURE IN YOUR OFFICE

SAME BENEFITS OF A REAL PLANT AND MORE!

BENEFITS

HEALTHIER WORKPLACE
Reduce stress & increase creativity

ZERO MAINTENANCE
Do not require watering, light exposure, trimming or dusting

LICHEN WALLS

A TOUCH OF NATURE IN YOUR OFFICE

IDEAL LOCATIONS

The lichen wall can be placed in nearly every **indoor space.**

It is ideal as a **partition** wall to separate functional spaces.

Use it to **reinvent** your open space creating a sense of reconnection with nature.

Can be applied on an **existing wall** to liven it up.

It is the perfect **green vertical solution**, with maximum benefits at low maintenance.

LICHEN WALLS

A TOUCH OF NATURE IN YOUR OFFICE

LIFE CYCLE & MAINTENANCE

Guaranteed for 4 years, however proven to last longer

No need to dust, thanks to its antistatic properties
